

Building Bridges through Sensory Integration, 3rd edition

Therapy for Children with Autism and Other Pervasive Developmental Disorders

Paula Aquilla, BSc, OT, Ellen Yack, BSc, MEd, OT, and Shirley Sutton, BSc, OT
978-1-935567-45-5 | \$29.95

Written by three experienced occupational therapists, this book offers a combination of theory and strategies. It is a perfect tool for those working with young children, but also broad enough to be adapted for older children and adults. *Building Bridges* provides creative techniques and useful tips, while offering innovative strategies and practical advice for dealing with everyday challenges. Part one explains the role of occupational therapists in treatment and examines sensory integration theories. Part two offers methods of identifying sensory problems in children, along with numerous strategies and activities.

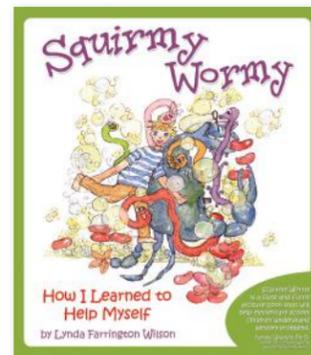

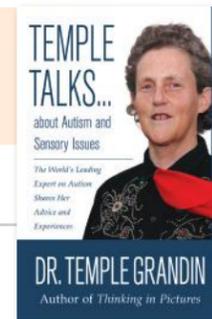

Temple Talks ... about Autism and Sensory Issues

The World's Leading Expert on Autism Shares Her Advice and Experiences

Temple Grandin, PhD | 978-1-935567-42-4 | \$9.95

It's your pocket guide to Temple Grandin; a great introduction to her advice on both autism and sensory issues! Temple gives an overview of what it's like to have autism and sensory difficulties, tells how she overcame her sensory issues, gives useful tips, then answers your questions in an easy-to-reference Q&A section.

Squirmy Wormy

How I Learned to Help Myself

Lynda Farrington Wilson | 978-1-935567-18-9 | \$14.95

Squirmy Wormy is a wonderful children's book about a boy named Tyler who has autism and Sensory Processing Disorder (SPD). Together with Tyler, the reader learns about SPD and what everyday, easy therapies he can do by himself to feel better. Endorsed by Dr. Temple Grandin, this book is sure to help many children lead calmer, richer lives.

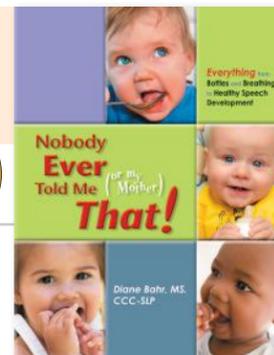

Nobody Ever Told Me (or My Mother) That!

Everything from Bottles and Breathing to Healthy Speech Development

Diane Bahr, MS, CCC-SLP | 978-1-935567-20-2 | \$24.95

This fascinating book fills a void in the child-rearing world. It explains everything from the basics of nursing, to SIDS, to facial massage, and finishes with the secrets to good speech development and keys to enhancing your child's best natural appearance. Written by a speech-language pathologist with more than thirty years of experience, this book contains practical advice for all new parents on everything they need to know about oral development from birth to eight years old.

Sensorimotor Interventions

Using Movement to Improve Overall Body Function

Cara Koscinski, MOT, OTR/L
978-1-935567-72-1 | \$14.95

Today's children often struggle with decreased attention and immature motor patterns which manifest themselves through frustration and behavior issues. This book provides education about using movement to improve overall function. By organizing activities by target area, therapists will enjoy choosing fun and easily duplicated therapeutic games. Each activity is broken down into specific target areas, including tactile, vestibular, visual perception, sensory modulation, posture, coordination, and many others.

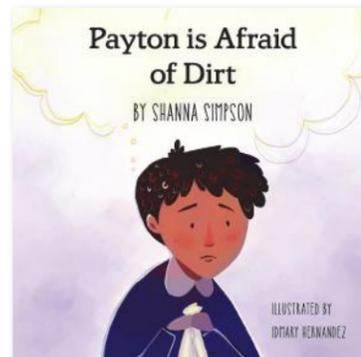

Feed Your Baby & Toddler Right

Early Eating and Drinking Skills Encourage the Best Development

Diane Bahr, MS, CCC-SLP
978-1-941765-67-8 | \$14.95

The majority of our eating and drinking skills are developed in the first two years of life. Parents can help with this process by using appropriate feeding techniques from birth. Every three months from birth, your baby will have a growth spurt in the area of feeding. Parents often receive very little instruction on ways to feed their children, yet good eating and drinking skills encourage the best mouth development and set up patterns for life. This book reveals secrets for better breast and bottle feeding, and feeding development for babies from birth to the toddler years.

Payton is Afraid of Dirt

Shanna Simpson | 978-1-941765-57-9 | \$12.95

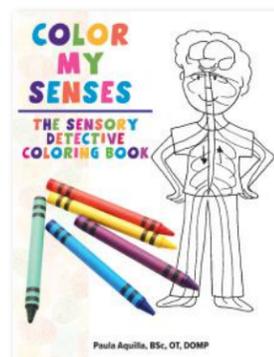

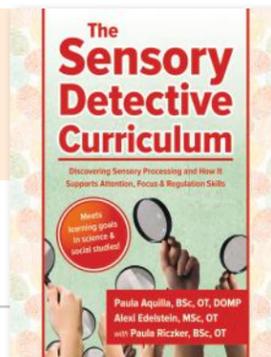

Payton is afraid of dirt. He's afraid of germs and getting sick, and spends a lot of his time cleaning and worrying over his fears. Payton learns he has Obsessive Compulsive Disorder (OCD). His OCD is like someone in his head is bossing him around all day long. It tells him that he has to wash and tidy, and cannot do the things he wants, like play outside. With the help of his family and doctor, Payton learns how to manage his OCD by putting it in an imaginary shrink machine, or ROARING it away! Learn how Payton, and others like him, make their OCD monsters smaller. You can do it, too!

The Sensory Detective Curriculum

Discovering Sensory Processing and How It Supports Attention, Focus & Regulation Skills

Paula Aquilla, BSc, OT, DOMP, Alexi Edelstein, MSc, OT,
with Paula Riczker, BSc, OT | 978-1-935567-60-8 | \$24.95

Understanding our sensory processing ability helps us to understand our likes, dislikes, and the strategies we use to help keep ourselves in a calm, alert state—which is necessary for learning! Knowing how to stay regulated is a life skill, which children need to learn early. Opening this discussion can help us understand how tensions rise, how bullying happens, and how children can become lonely, isolated, and misunderstood. Each chapter has fun activities to help students learn and to apply this knowledge to their own classroom.

Color My Senses

The Sensory Detective Coloring Book

Paula Aquilla, BSc, OT, DOMP | 978-1-935567-66-0 | \$9.95

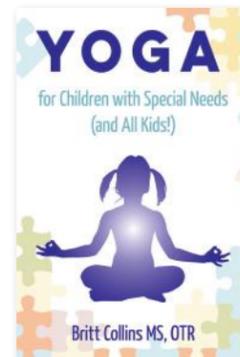

Children can learn about their own sensory processing through a variety of practical examples in this coloring book. They'll learn how they are processing sensations throughout the day and gain an awareness and appreciation of their marvelous nervous system!

It's Just a ... What?

Little Sensory Problems with Big Reactions!

Hartley Steiner | 978-1-941765-74-6 | \$9.95

This book brings awareness to how kids feel in the sensory moment through humor. Children will be introduced to ways they can begin to ask for and accept help, and adults will learn how to scale reactions during situations of upset. In each scenario the child is having a big reaction, and the adult is able to solve the issue through simple answers, compassion, and humor.

Sensory Yoga for Kids

Therapeutic Movement for Children of all Abilities

Britt Collins, MS, OTR/L | 978-1-935567-48-6 | \$14.95

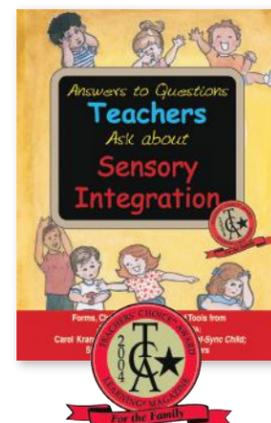

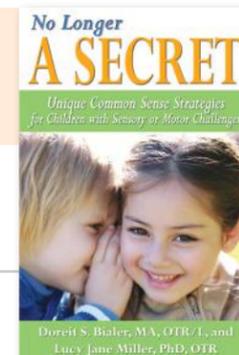

Yoga can bring calm and focus (and exercise!) to kids with special needs. It can help kids overcome motor challenges and strengthen their bodies while relaxing them. Occupational therapist Britt Collins tells how to use yoga to support special needs, increasing body awareness, and fine tune coordination skills. This book demonstrates how to get your kids started in a discipline that can offer a lifetime of benefits.

No Longer A SECRET

Unique Common Sense Strategies for Children with Sensory or Motor Challenges

Doreit Bialer, MA, OTR/L, & Lucy Jane Miller, PhD, OTR
978-1-935567-29-5 | \$19.95

Two great minds offer easy, effective strategies YOU can use to help kids with sensory and motor issues! This invaluable resource by Doreit Bialer and Dr. Lucy Jane Miller, author of *Sensational Kids*, helps teach you cost effective, on-the-spot, problem-solving tips to use for children with sensory issues. Any parent, teacher, or therapist can learn the strategies in this book to help the child in their life!

Answers to Questions Teachers Ask about Sensory Integration

Forms, Checklists, and Practical Tools

Jane Koomar, PhD, OTR/L, FAOTA, Carol Kranowitz, MA, and Stacey Szklut, MS, OTR/L | 978-1-932565-46-1 | \$14.95

In this book, you'll find tried-and-true instructions for developing fine-motor, "organizing," and motor-planning skills, along with providing an appropriate "sensory diet" that will benefit all your students. Checklists help you identify kids who have difficulty processing sensory information.

Eyegames: Easy and Fun Visual Exercises

An OT and Optometrist Offer Activities to Improve Vision!

Lois Hickman MS, OTR, FAOTA, and Rebecca E. Hutchins OD, FCOVD
978-1-935567-17-2 | \$9.95

Developing healthy visual-motor abilities is more difficult in the complex stimulus of today's world than ever before. Our visual experiences can be overwhelmed by the vast complexity of artificial colors and sounds that did not exist in our ancestors' lives. This helpful book gives an overview of the development of vision, with a checklist of warning signs of vision problems. Practical, playful activities designed to improve visual skills in both adults and children are also included. A must-read for anyone dealing with visual difficulties!
